Which Linux command do you love the most? Why?	Sudo find / -type f -name "filename" (I can search the whole system)
How would you read a file in the Linux terminal?	Cat (concatenate)
Tell me about the last time you analyzed logs in Linux for security issues or for fun.	Challenge 20 in book 7 workshop

Computer Languages

Question	Best Answer
What is bash?	Bourne-again-shell (it is an interpretative language that serves as a default language and can be used for automated scripts)

System Administration

Question	Best Answer
Which Linux distribution do you like the most?	Ubuntu (because I am most familiar with it, I just finished a comprehensive boot camp in which we used this OS alot)
What is the difference between Linux, Unix, and GNU?	<p>Unix is closed source, Unix is the father of command line OS, GNU aims to replace linux but has no kernel, Linux is just a kernel with no OS, people combine it with GNU to make a complete OS. GNU is a library of tools used for Linux</p> <p>Unix is the original proprietary operating system Linux was made in the 90's as an alternative to Unix Linux incorporates GNU to make a full operating system with commands, it's the free software foundation (example ls, cd, etc.)</p>
My Linux server keeps losing network connectivity. How do I troubleshoot this?	Check the ip address (ip a) then look at ip link status (ip link show) then restart network (sudo systemctl restart NetworkManager)
